[Performance](#)

Abstract: Building smart teams is an essential guide to creating high-performance teams fast. Based on research results from close to 2,000 individuals organized into more than 250 teams, the text identifies the three critical skill sets that teams need and shows how to transfer these skills to a group. The authors' research and experience show that, by concentrating on these three critical skill sets, a group is almost certain to become a high-performing team quickly.
