[Child Welfare](#)
[Family Relations](#)
[Aboriginal Health Collection](#)

Abstract: In this deeply moving feature-length documentary, three sisters and a brother meet for the first time. Removed from their young Dene mother during the infamous Sixties Scoop, they were separated as infants and adopted into families across North America. Betty Ann, Esther, Rosalie, and Ben were only four of the 20,000 Indigenous Canadian children taken from their families between 1955 and 1985, to be either adopted into white families or live in foster care. As the four siblings piece together their shared history, their connection deepens, and their family begins to take shape. -website

Format: Book
Subject: [Health Services, Indigenous Population Groups](#)
[Social Determinants of Health](#)
[Ethnology](#)
[Aboriginal peoples](#)
[Indigenous peoples](#)
[First Nations](#)
[Aboriginal Health Collection](#)

Abstract: "Continuing the theme of social determinants of health, this book is an historical examination of Canadian legal regimes and the negative impact they have had on the health of Aboriginal peoples. Everything from the early ban on traditional practices to the constitutional division of powers is examined (including who is responsible for off-reserve Indians under the Constitution). The author argues there is a clear connection between the health of individuals and the legal regime under which they live, and that our legal regime is one of the determinants of health. She contrasts the state of Aboriginal health in pre-contact days with their health today. The book provides comprehensive reviews of both health statistical data, historical practices aimed at Aboriginal peoples, and an analysis of legal principles that have developed in Canadian law as it applies to Aboriginal peoples. It outlines how commitments made by treaty and Supreme Court of Canada rulings on Aboriginal rights, the duty to consult, and the special constitutional status of Aboriginal peoples can be used to advance the health of Aboriginal peoples. The book concludes with a practical framework for the reconciliation of Aboriginal health and healing practices within Canadian society."--Pub. desc.

[Ecology](#)
[Botany](#)
[Nature](#)
[Human-plant relationships](#)
[Philosophy](#)
[Aboriginal Health Collection](#)

Abstract: "As a leading researcher in the field of biology, Robin Wall Kimmerer understands the delicate state of our world. But as an active member of the Potawatomi nation, she senses and relates to the world through a way of knowing far older than any science. In Braiding Sweetgrass, she intertwines these two modes of awareness--the analytic and the emotional, the scientific and the cultural--to ultimately reveal a path toward healing the rift that grows between people and nature. The woven essays that construct this book bring people back into conversation with all that is green and growing; a universe that never stopped speaking to us, even when we forgot how to listen"-- Provided by publisher.
